

Whoosh...

### PANZERSCHRECK

First available Feb 43

Size = 88mm, 5 x hollow-charge rounds  
Penetration at 30 degrees = 148mm  
Velocity = 100m/s  
Blast = 14  
Range = 225m

### PIAT

First avail Jul 43

Size = 77mm, 6 x h-charge rounds  
Pen at 30 degrees = 81mm  
Vel = 100m/s  
Blast = 5  
Range = 200

### BAZOOKA

First avail Jan 43

Size = 60mm, 8 x h-c rounds  
Pen at 30 degrees = 78mm  
Vel = 83m/s  
Blast = 6  
Range = 200

### HIT CHANCE

	<u>25m</u>	<u>50m</u>	<u>100m</u>	<u>150m</u>	<u>200m</u>	<u>225m</u>
PANZERSCHRECK	91%	89%	60%	28%	11%	7%
BAZOOKA	91%	84%	47%	19%	5%	-
PIAT	76%	67%	44%	22%	8%	-

The test was conducted with vet firers against static medium-size AFV's (Churchill and Brumbar as both are same silhouette size) clear weather mid-day

SUMMARY - the fifty-fifty hit chance range for the schreck is about 110m, and about 90m for the others.

PENETRATION (based on tests and combat observations) -

Thickest (blue) armour - None of the three can pen.

Thick (dk green) armour - Schreck usually pens but the other two rarely.

Medium (med green) armour - Schreck easily pens, the other two sometimes.

Lighter green armour and thinner - All three penetrate regularly.

(Note - non-penetrating hits may still score useful partial pens and gun hits / immobs)
