### GERMAN ARMoured CARS - cmak

The 41-odd screenshots below depict every armoured car in CMBB/AK and provide an at-a-glance reference.

(Note for several cars Battlefront lazily borrows another cars gun graphic instead of creating a new one, for example the German 233 8-wheelers 75mm gun uses the 20mm gun graphic)

## GERMAN ARMoured CARS - cmbb

Cmbb has all the German cars that cmak has, **plus** these four.

Also as Leto says, the Puma is listed among the cmbb tank category, so are the 75mm short and long jobs.

PS - Battlefront never gave the 75 long a proper gun graphic, maybe there's a mod out there that'll do it

## ITALIAN ARMoured CARS - cmak

There are only these two..

## HUNGARIAN ARMoured CAR

## RUSSIAN ARMoured CARS

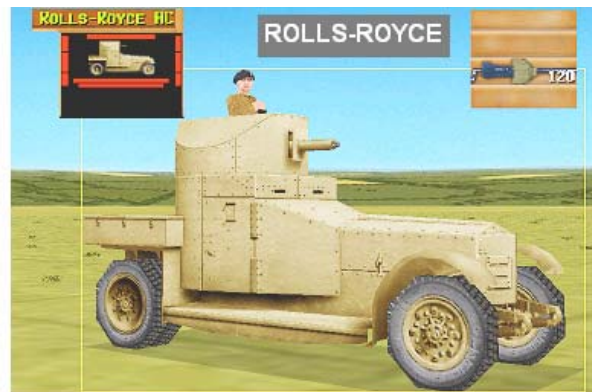

The BA-10 has fractionally thicker armour than the BA-6
